

Vancouver Air/Ground Ambulance Services

We're ready to meet your needs. We provide services to cover all aspects of your safety and medical coverage needs. This includes on-set consultation, ambulances services, onsite medical standby and air ambulance transport. We can handle the most demanding tasks to keep you, your staff and your production staff happy and safe. We service many industries including construction projects, oil and gas industry, forestry, and of course the BC television and motion picture production companies.

Some of the medical services we offer:

- **Full Service Paramedic Ambulances** (stunt standby, large crew calls, safety for work around water, remote locations, wilderness safety)
- **On Site Paramedic Services** (hazardous filming location or remote, weddings, pool parties, music tours, PR tours)
- **4 x4 Paramedic Response Unit** (hard to get places, paramedic response)
- **Air Ambulance Services** (worldwide transportation services, and escorts)

We provide comprehensive on-site medical services to assist productions with their regulation requirements while filming throughout Canada. Our industrial ambulance services are provided to cover your Worker Compensation Board production needs, rural filming, stunt standby, and 2nd Unit coverage.

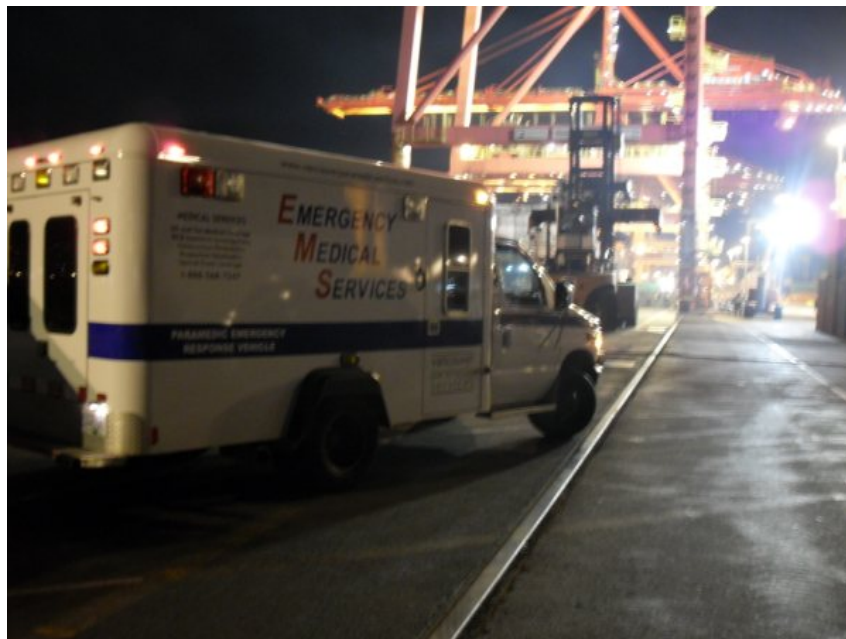

We can provide any level of care from single attendants to full medical teams comprised of many types of professional medical personnel. Our services extend to urban and rural filming environments throughout BC and Alberta with use of our ambulances. If you need to feel at ease that you're medical requirements are covered, then let us be your provider of choice.

Production Unit Paramedic

Vancouver Ambulance Services specializes in providing qualified unit paramedic's for long term attachment to your film units. Our staff is fully qualified BC registered paramedics with front line experience in Film and TV work. VAS staff will always be equipped to deal quickly and effectively with both serious accidents, and minor injuries, illnesses and ailments on location while filming. Your crew will be qualified, equipped and we provide full medical malpractice insurance & third party insurance for our staff so your production is covered by the best in the business. We specialize in additional coverage for second unit, pre-rigging, strikes, small house parties, parties, music tours, award shows and film stunts.

For remote locations, "off road" locations or sets with poor road access, we can provide fully equipped Medical Support Units. 4 x 4 vehicles are used extensively for horse scenes, filming in the woods, quarries, beaches or fields. All too often productions book a "conventional" ambulance - only for us to find that the location and terrain means our crews would have difficulty reaching or removing a casualty.

Paramedic Ambulance Services

Our private ambulance fleet is available for your remote needs, stunts, and large production teams. Under Worksafe BC requirements, an emergency transportation vehicle is required for remote and hazardous shooting locations. We have you covered.

In the event of an emergency, our ambulance crews and first responders are trained with ITLS vehicle extrication training to reach, stabilize and extricate trapped patients. They are also specially trained for hybrid vehicles, trucks, buses and small aircraft.

Vancouver Ambulance always has an ambulance available 24hrs 7 days a week
